

STEEL TARGET RULES

1. The use of steel targets is restricted to members (and their guests) who have been qualified and approved by the designated Steel Safety Officer.
2. All steel targets must be constructed of AR-500 steel or approved substitute.
3. Standard handgun calibers only, including .22 rimfire, will be allowed. Centerfire rifles, rifle calibers in handguns, .17 caliber rimfire/centerfire and .22 magnum are not allowed.
4. Steel targets must be placed so that any miss will impact the berms. No rounds shall hit the ground in front of the berms.
5. All steel targets must be flat and free of dents, gouges or imperfections that may throw bullets or jacket material back to the shooter.
6. Target stands must be constructed of material that will prevent objects from being thrown back to the shooter. Stands of lightweight material should not be used.
7. Target stands should hold the target firmly. Targets must remain perpendicular to the shooter and not be twisted left/right or at odd angles.
8. Steel targets must be no closer than 12 yards from the shooter and be installed such that the steel is slanted slightly downrange at the bottom.
9. Steel thickness must be a minimum of 3/8" thick.
10. Use of steel shot, steel core, penetrator or armor piercing rounds is prohibited.
11. A member of the B.O.D. is to be notified immediately of any problems that arise from use of steel targets.
12. Steel targets will only be used on the 25yd multipurpose range.
13. Eye protection is required.

SAFETY ACKNOWLEDGEMENT

I acknowledge the safety rules above and agree to abide by those rules and all other rules of Palo Alto Rifle & Pistol Club. I further understand that shooting steel targets is a privilege which requires extreme care and diligence.

I also understand that any violation or unsafe conduct may result in expulsion from Palo Alto Rifle & Pistol Club.
